(54) Title: 2,4-DIAMINO QUINAZOLINE AND PYRIDOPYRIMIDINE ESTER DERIVATIVES AS DIHYDROFOLATE RE-
DUCTASE INHIBITORS

(57) Abstract: The invention provides novel compounds of the formula II: wherein R₁, R₂, R₃ and R₄ are independently hydrogen or a group that liberates the free amine *in vivo*, for example -CO-alkyl, preferably -CO-C₁-C₃ alkyl or pivalate; or -COhaloalkyl, preferably -CO-C₁-C₃ haloalkyl, most preferably -CO-C₁-C₃ chloroalkyl; wherein W is; and @ denotes the points of attachment and wherein the ester can be located in either direction; wherein n and m are independently 0-5; wherein one but not both of X and Y can be nitrogen, or X is C-A and/or Y is C-B; wherein A and B are independently selected from hydrogen, alkyl optionally substituted with a halogen, an electron donor group such as amino, alkylamino, dialkylamino or hydroxy, or an electron acceptor group such as nitro, cyano, trihaloalkyl or amido, alkoxy or halogen; and pharmacologically acceptable salts thereof. Provided that when R₁ to R₄ are hydrogen, both X and Y are C-H, n is 1 and -(CH₂)_n is attached to the bridging oxygen of the ester group W, then m cannot be 0 or 1.
